

# HOOMAN VAHDAT

Application Developer · Entry Level

+1 437 255 5801 · hoomanv3@gmail.com · linkedin.com/in/hoomanvahdat · Richmond Hill, ON

## SUMMARY

---

Entry-level Application Developer with hands-on experience building web applications and API integrations using Python, JavaScript, and Django. Completed four full-stack projects through Harvard's CS program on EDX, including a social networking platform and a functional email client with REST API integration. Eager to contribute to application development and system integration workflows in a collaborative, customer-facing environment.

## SKILLS

---

**Languages & Frameworks:** Python (Anaconda, Jupyter), JavaScript, Java, Django, React, Visual Basic

**Web & UI:** HTML, CSS, Web Application Development, REST API Integration

**Data & Reporting:** SQL, R, Excel, Google Sheets, Statistics, Custom Reports

**Tools & Other:** Git, Computer Maintenance / Repair, System Integration

## PROJECTS

---

**Flask Cohere Chatbot** — *Python · Flask · Cohere API · Flask-WTF · HTML/CSS (2026)*

- Built a fully functional conversational AI web application from scratch using Python and Flask, powered by Cohere's large language model API.
- Implemented secure form handling with CSRF protection via Flask-WTF; managed API authentication and resolved cross-version integration challenges to deliver a polished end-to-end chatbot experience.

**Diabetes Prediction App** — *Python · Streamlit · Scikit-learn · Machine Learning (2026)*

- Trained a scikit-learn classification model on a standard diabetes dataset and wrapped it in a Streamlit interface for real-time, browser-based predictions from user-entered health metrics.
- Demonstrates applied ML skills across the full pipeline — from data input and model training through inference to interactive output — with no coding required from the end user.

**Stock Portfolio Tracker** — *Python · Flask · HTML/CSS (2026)*

- Built a personal stock portfolio web application using Python and Flask, allowing users to browse and select from a pre-loaded stock library with clear portfolio composition views.
- Designed the full data flow between back-end logic and front-end interface, applying Flask routing and template rendering patterns across the application.

**Wiki — Online Encyclopedia** — *Harvard University via EDX (2025)*

- Built a Wikipedia-like web application using Django (Python) and HTML, enabling users to create, edit, and search encyclopedia entries.

**TRIMester — Weight Loss Web Application** — *Toronto Metropolitan University (2025)*

- Delivered a weight-monitoring web application using HTML/CSS and Google Tools, earning a grade of 100 in class.

## EXPERIENCE

---

**Internet Analyst & Social Media Evaluator** | Appen · Independent Contractor

*Oct 2025 – Present · Remote*

- Evaluated and rated web application content across [FILL IN: 50+] daily tasks, applying structured analysis frameworks to improve data quality for AI training pipelines.
- Flagged system integration issues and content policy violations across social platforms, contributing to a [FILL IN: X%] improvement in evaluation accuracy scores.

## **Freelance Computer Technician & Academic Tutor | Self-Employed**

2000 – Present · Toronto, ON

- Boosted student performance from 50% to 80% average across math and statistics coursework by designing personalized study frameworks for [FILL IN: 20+] clients.
- Diagnosed and resolved software/hardware failures for [FILL IN: 100+] clients, maintaining a 100% satisfaction rate over 22 years of independent practice.

## **Census Phone Operator | Statistics Canada**

May 2006 – Aug 2006 · Toronto, ON

- Ranked in the top 20% of team performance within 4 months by maintaining above-average accuracy and call volume across a high-throughput data collection operation.
- Expanded department reach by translating inquiries for Persian-speaking respondents, directly contributing to a 4% productivity increase.

## **Computer Technician | IBM (via Kelly Services)**

2007 · Markham, ON

- Deployed and configured [FILL IN: XX] point-of-sale systems across client sites, increasing sales processing efficiency by [FILL IN: XX%].
- Collaborated with project owners and on-site teams to coordinate installation schedules, ensuring zero downtime across [FILL IN: XX] deployment locations.

## **EDUCATION**

---

### **M.Sc. in Data Science (In Progress) · University of Colorado Boulder**

Apr 2026 – Present · Online

- Relevant coursework: [FILL IN: e.g. Machine Learning, Statistical Computing, Data Visualization]

### **Certificate in Computer Programming Applications · Toronto Metropolitan University (Ryerson)**

2016 · Toronto, ON

### **Diploma in Computer Network Technician · CDI College**

2016 · Regina, SK

## **TRAINING & CERTIFICATIONS**

---

### **Computer Science for Web Programming**

Harvard University via EDX · Python, JavaScript, SQL, Django, Flask, Bootstrap

### **Google Data Analytics Certificate**

Google via Coursera · Data analysis, visualization, and reporting workflows

### **Python For Everybody**

University of Michigan via Coursera · Data gathering, cleaning, analysis, and visualization

### **ISC2 Certified in Cybersecurity (CC) — In Progress**

ISC2 Official Self-Paced Training

### **Big SQL Energy — Beginner & Intermediate**

SQL for data analysis and custom reporting
