

HOOMAN VAHDAT

Software Developer

437-255-5801 · hoomanv3@gmail.com · linkedin.com/in/hoomanvahdat · hoomanv3xo.github.io

SUMMARY

Software Developer based in the Greater Toronto Area, building web applications and APIs with Python, HTML/CSS, React, SQL. Eager to contribute to application development and system integration workflows in a collaborative, customer-facing environment.

SKILLS

Languages & Frameworks: Python (Flask, Django), JavaScript(React), Java, Visual Basic

Web & UI: HTML, CSS, Web Application Development, REST API Integration

Data & Reporting: SQL, R, Excel, Google Sheets, Statistics

PROJECTS

Flask Cohere Chatbot — *Python · Flask · Cohere API · Flask-WTF · HTML/CSS* (2026)

- Built a fully functional conversational AI web application from scratch using Python and Flask, powered by Cohere's large language model API.
- Implemented secure form handling with CSRF protection via Flask-WTF; managed API authentication and resolved cross-version integration challenges to deliver a polished end-to-end chatbot experience.

Diabetes Prediction App — *Python · Streamlit · Scikit-learn · Machine Learning* (2026)

- Trained a scikit-learn classification model on a standard diabetes dataset and wrapped it in a Streamlit interface for real-time, browser-based predictions from user-entered health metrics.
- Demonstrates applied ML skills across the full pipeline — from data input and model training through inference to interactive output — with no coding required from the end user.

Stock Portfolio Tracker — *Python · Flask · HTML/CSS* (2026)

- Built a personal stock portfolio web application using Python and Flask, allowing users to browse and select from a pre-loaded stock library with clear portfolio composition views.
- Designed the full data flow between back-end logic and front-end interface, applying Flask routing and template rendering patterns across the application.

Wiki — Online Encyclopedia — *Harvard University via EDX* (2025)

- Built a Wikipedia-like web application using Django (Python) and HTML, enabling users to create, edit, and search encyclopedia entries.

TRIMester — Weight Loss Web Application — *Toronto Metropolitan University* (2025)

- Delivered a weight-monitoring web application using HTML/CSS and Google Tools, earning a grade of 100 in class.

EXPERIENCE

Independent Developer — Personal Projects

2023–Present

- Built and deployed personal web projects using Python, Django/Flask, and React to deepen full-stack development skills.
- Implemented REST APIs and integrated front-end interfaces with back-end logic across multiple projects.

- Maintained project repositories on GitHub, documenting code and iterating based on self-directed learning.

Software Developer — Academic Projects

Toronto Metropolitan University | 2013–2016

- Designed and built web applications as part of computer programming coursework, applying Python, Django, and React across the full stack.
- Developed and queried relational databases using SQL to support dynamic, data-driven applications.
- Collaborated on version-controlled codebases using Git and GitHub, following standard software development workflows.

Internet Analyst & Social Media Evaluator | Appen · Independent Contractor

Oct 2025 – Present · Remote

- Evaluated and rated web application content across many daily tasks, applying structured analysis frameworks to improve data quality for AI training pipelines.
- Flagged system integration issues and content policy violations across social platforms, contributing to improved evaluation accuracy scores.

Freelance Computer Technician & Academic Tutor | Self-Employed

2000 – Present · Toronto, ON

- Boosted student performance from 50% to 80% average across math and statistics coursework by designing personalized study frameworks for 50+ clients.
- Diagnosed and resolved software and hardware failures for 20+ clients, maintaining a 100% satisfaction rate over 22 years of independent practice.

EDUCATION

M.Sc. in Data Science (In Progress) · University of Colorado Boulder

Apr 2026 – Present · Online

- Relevant coursework: Machine Learning, Statistical Computing, Data Visualization

Certificate in Computer Programming Applications · Toronto Metropolitan University (Ryerson)

2016 · Toronto, ON

Diploma in Computer Network Technician · CDI College

2001 · Regina, SK

TRAINING & CERTIFICATIONS

Computer Science for Web Programming

Harvard University via EDX · Python, JavaScript, SQL, Django, Flask, Bootstrap

ISC2 Certified in Cybersecurity (CC)

ISC2 Official Self-Paced Training

Big SQL Energy — Beginner & Intermediate

SQL for data analysis and custom reporting

Google Data Analytics Certificate - In Progress

Google via Coursera · Data analysis, visualization, and reporting workflows

Python Programming Fundamentals - In Progress

Microsoft via Coursera · Web Development, Data Science and Automation
