SUMMARY

Junior software engineer who builds and deploys full-stack applications with Python (Django, Flask), React, Angular, and Java.
Load-tested a real-time Django Channels chat app with 50 concurrent WebSocket clients (12,500/12,500 messages delivered) and cut a Java registry's course lookup from about 3.4 seconds to about 1 ms. M.Sc. Candidate in Computer Science at the University of Colorado Boulder.

PROJECTS

Registry

https://github.com/hoomanv3xo/Registry

Java

- Built a student registry that manages students, courses, and grades, with browse, search, add, and delete functions.
- In the included benchmark, opening a course with 100,000 students and 500,000 marks dropped from about 3.4 seconds (linear scans) to about 1 ms.

Tic-tac-toe in React

github.com/hoomanv3xo/tic-tac-toe-react

React, JavaScript, HTML/CSS

- An interactive two-player tic-tac-toe game built with React. Players take turns placing X and O on a 3×3 board, and the game detects wins and draws automatically. Live Link: hooman-tictactoe.netlify.app

Chat app

https://github.com/hoomanv3xo/chatapp

Django, Django Channels, WebSockets

- Load-tested real-time chat locally with 50 concurrent WebSocket clients: 100% message delivery (12,500/12,500), zero dropped connections.

AI Chatbot

https://github.com/hoomanv3xo/Chatbot

Python, Flask, Cohere API

- Built and deployed a Flask web app that sends user questions to the Cohere LLM API and renders responses as formatted Markdown in a custom chat interface.

Local Restaurants Map

https://github.com/hoomanv3xo/Local-Restaurants-Map

Angular, TypeScript

- Built an app that requests the visitor's location and marks nearby restaurants, cafés, and fast-food places on a map.

Stocks Portfolio

https://github.com/hoomanv3xo/Stocks-Portfolio

Python, Flask, HTML/CSS

- Built a stock-tracking app where users enter a symbol, number of shares, and purchase price, then view holdings in a portfolio table. Live link: hooman-stocks.onrender.com

SKILLS

Python JavaScript SQL HTML/CSS React Java TypeScript Django Flask Git

EDUCATION

Candidate for M.Sc. in Computer Science

University of Colorado Boulder

04/2026 - Present Online

- Computer Science fundamentals, including Algorithms, Systems, Programming, and Security.

Candidate for B.Sc. in Computer Science

University of the People

2022 - Present Online

- Java I & II, Python, Algebra, Databases I & II, and Philosophy

Certificate in Computer Programming Applications

Toronto Metropolitan University (Ryerson)

2017 Toronto, ON

- Python, Java I & II, C, Unix, JQuery, Algebra, Statistics, and Visual Basic.
- Honors List for Term 5 of the 2024-2026

EXPERIENCE

Commonwealth Bank Introduction to Software Engineering Job Simulation

Forage

10/2026 - 10/2026 Online

- Built a brand-compliant HTML/CSS page with 10 customer security tips (7 style requirements met) and wrote a 350-word secure hosting proposal covering 6 risks.

QA Tester

Upwork

10/2026 - 10/2026 Online

- Tested sign-up, login, search, and account flows on a prediction-market web app; documented a sign-up defect and UI contrast issues in a written report.
